“Custom Classic” Microphone Cable

The “Custom Classic” series of microphone cables was developed as a retrofit for the great vintage tube microphones by AKG, Neumann, Telefunken and others. Once implemented, the improvement in performance of these wonderful microphones is every bit, if not more, dramatic as the improvement experienced using “The New Cable” on standard XLR microphones.

“The New Cable” is the single best upgrade you can make for your coveted classic and perhaps, most important and reassuring, it can be done without altering the mic itself.

Due to the unavailability of the connectors, it is necessary for the original connectors to be sent to us for retrofitting to “The New Cable”. The old connectors will be checked, cleaned and retensioned in the process. Please allow 4 to 6 weeks for fabrication and delivery.

Custom Classic Microphone		Price			
Model#	Length	5-pin	6-pin	7-pin	8-pin

“Custom Modern” Microphone Cable

The “Custom Modern” series of microphone cables was developed as a retrofit for the current generation of tube microphones by AKG, B&K, Brauner, Neumann, Soundelux and virtually all others. Once implemented, the improvement is every bit as dramatic as that experienced using “The New Cable” on standard XLR microphones.

“The New Cable” is the single best upgrade you can make for your modern tube microphones and it can be done without alteration to the mic.

We keep a good inventory of connectors on hand so many orders can be delivered within one week. Occasionally, however, due to the logistics of maintaining an inventory of all the various connectors used by the vast number of makers today, it is necessary for us to special order the connectors. Once connectors are delivered to us, please allow 1 to 2 weeks for fabrication and delivery.
